

AYYALURI SATISH KUMAR REDDY

Aspiring SOC Analyst | SIEM & IDS | Threat Detection & Incident Response

Bengaluru, India | +91 7075437003 | satishayyaluri6303@gmail.com | linkedin.com/in/ayyaluri-satish | github.com/satish-ayyaluri

PROFESSIONAL SUMMARY

B.Tech graduate in Computer Science & Engineering with a strong foundation in Cybersecurity and Security Operations Center (SOC) operations. Hands-on experience building a Home SOC Lab using Snort 3 IDS and Splunk Enterprise SIEM for real-time security monitoring, log analysis, threat detection, and incident investigation. Practical experience managing incident tickets in ServiceNow, including diagnosis, resolution, and documentation. Skilled in Python, Linux, networking fundamentals, and web application security testing using Burp Suite. Completed the Google Cybersecurity Professional Certificate and NPTEL Python certification. Seeking an entry-level SOC Analyst or Cybersecurity Analyst role.

TECHNICAL SKILLS

- **Security Operations:** Splunk Enterprise SIEM, Snort 3 IDS, Security Monitoring, Log Analysis, Event Triaging, Threat Detection, Incident Response
- **ITSM & Ticketing:** ServiceNow (Incident Management, Work Notes, Resolution Documentation)
- **Web Security:** Burp Suite, OWASP Top 10, SQL Injection, CSRF, SSRF, Access Control, Authentication Bypass, Local File Inclusion (LFI)
- **Programming & Scripting:** Python, SQL
- **Operating Systems:** Kali Linux, Ubuntu, Windows
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, ICMP, Packet Analysis, Traffic Monitoring
- **Tools & Platforms:** Git, GitHub, VirtualBox, Nmap

PROJECTS

Home SOC Lab

- Built a virtualized Home SOC Lab using Kali Linux, Ubuntu, Snort 3 IDS, and Splunk Enterprise SIEM.
- Configured custom Snort IDS rules to detect simulated cyberattacks and suspicious network activity.
- Simulated ICMP flood and Nmap port scan attacks to validate detection rules and improve alert accuracy.
- Integrated security logs into Splunk dashboards for real-time monitoring, event correlation, and threat analysis.

ServiceNow Incident Management (Hands-on, PDI)

- Managed and resolved incidents in ServiceNow across Critical, Moderate, and Low priority levels, spanning access management and service outage scenarios.
- Diagnosed root cause and documented investigation steps in work notes prior to resolution.
- Closed tickets with appropriate resolution codes and resolution notes, maintaining a clear audit trail for each incident lifecycle.

PortSwigger Web Security Labs

- Completed 30+ hands-on labs covering Authentication, Access Control, SQL Injection, CSRF, SSRF, and Local File Inclusion vulnerabilities.
- Performed vulnerability assessment, exploitation, and mitigation using Burp Suite while strengthening secure web application testing skills.

Python Security Tools

- Developed a SOC Log Analyzer to parse security logs and identify suspicious events using Python.
- Built Python applications including a Password Manager, Exercise Tracker, Pomodoro Timer, Flash Card App, and Quiz App to strengthen programming and automation skills.

ACHIEVEMENTS

- Built an end-to-end Home SOC Lab using Snort 3 IDS and Splunk Enterprise SIEM.
- Completed 30+ PortSwigger Web Security Academy labs.
- Developed 5+ Python projects, including a SOC Log Analyzer.
- Completed the Google Cybersecurity Professional Certificate.
- Maintained an active cybersecurity portfolio on GitHub.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Google / Coursera (Completed: July 2026)
- The Joy of Computing Using Python — NPTEL (IIT Madras)

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering 2026

- Siddhartha Institute of Engineering & Technology, Puttur | CGPA: 6.3/10
